WATERFORD
15 ROPE FERRY ROAD
WATERFORD, CT 06285
Attention Chief Elected Official for WATERFORD

At Eversource, we are dedicated to delivering reliable energy and providing excellent customer service. Our comprehensive vegetation management program includes year-round tree work to protect the electric system. This work is needed as day to day trees are the number one cause of outages, especially during storms in Connecticut.

Statewide, our data shows a continued need for regular tree maintenance due to the challenges posed by drought, tree disease and more intense storms. A total of 4,339 roadside distribution miles are planned under the 2026 scheduled maintenance. Eversource's Vegetation Management team inspects and assesses trees along these miles prioritizing and performing tree work to maximize reliability for the greatest number of customers. Included in this mailing is a map of the town with the roads scheduled for vegetation assessment highlighted. Scheduled maintenance tree work in your town is estimated to begin in January.

Susan Stotts, an Eversource Arborist, will be the point of contact for all aspects of the work in your community. Susan Stotts can be reached at 860-333-4883. In the coming weeks, our expert Arborists plan to work closely with community leaders and residents to discuss plans before tree work begins.

Please contact me at 860-665-6149 for any questions regarding Eversource's vegetation management program.

Sincerely,

Jenna Turner, Manager of Connecticut Distribution Vegetation Management
