DEPARTMENT OF PUBLIC WORKS MEMO

To: Maureen Fitzgerald, Environmental Planner

From: Daniel Matheson, Assistant Director of Public Works *DM*
Thomas McKittrick, General Foreman *TK*

Date: 4/08/2022

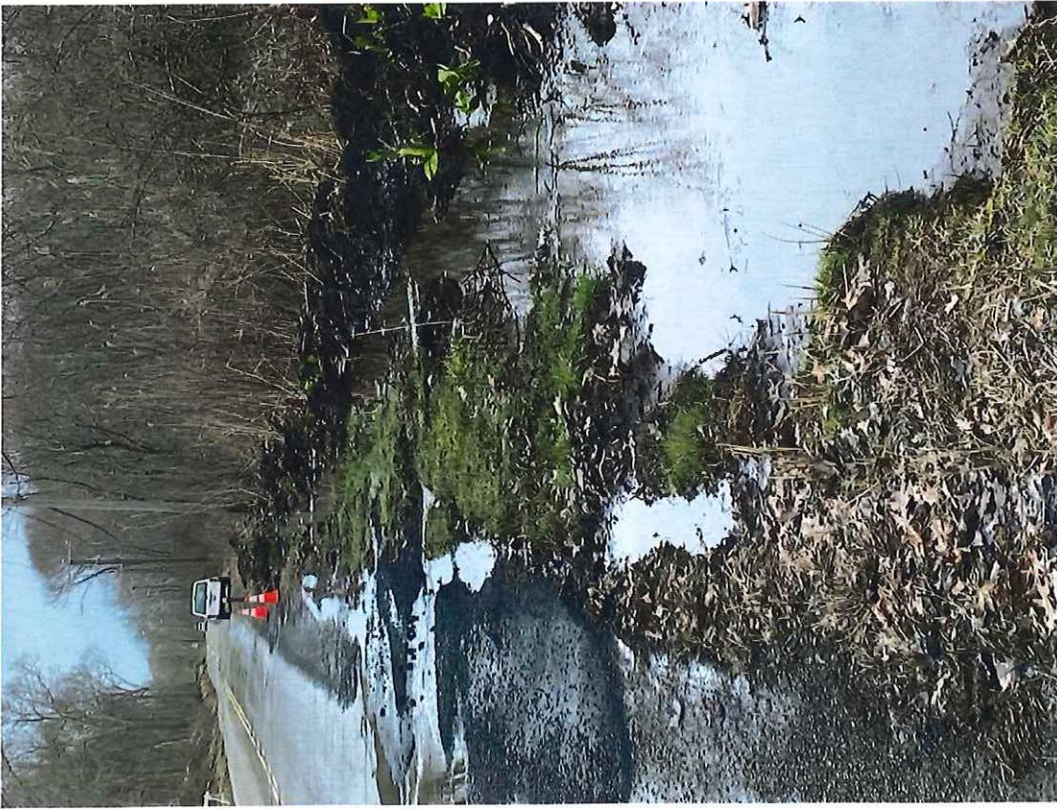

Re: General Drainage System Maintenance and Emergency Repair Plan

Maureen, this memo is to inform you of work the Public Works Department performed on Gardiners Wood Road. The roadway is in decline and during the winter months water overtops the road in a certain section. There is also concerns for emergency reasons on this road when the roadway ices up. The road also has numerous areas requiring repair of potholes. This work was performed with the interest of public safety. The department had moved material to try to redirect water flow from over the roadway. Emergency drainage swale work was performed to alleviate water backing up over the road. At present time the area still has considerable flow and once the water recedes we plan on trying to implement drainage improvements that were approved on Permit #C-19-02. Until we can get in to perform the improvements we will clean up the area we disturbed in accordance with the general permit, and perform more work to address the drainage issue.

Please reach out to us with any concerns.
