**Re; Board of Selectmen Regular Meeting
Public Comment, FS Visitor Records**

Dear Board of Selectman/Selectwomen,

Over the past couple of weeks Waterford residents have visited FS Brule's office in person to request a town wide information meeting about NE Edge, LLC and the Data Center project. Those Waterford residents' names are missing from today's agenda. I believe it would have been relevant to include them in line item 28.

As matters of transparency, I want to reiterate a previous request, that FS Brule conduct a town wide information meeting about the Data Center project. I also ask the BOS to implement a sign in sheet at the entrance to the FS office to record daily visits by anyone visiting the FS. Planned or unplanned. *At minimum*, a sign in sheet should document **date** and time, **first and last names of visitors**, **business name and address**, **resident address**, and **purpose of visit**. That way, those important visits can be recorded and referred to when necessary.

It might look something like this:

First Selectman Office Visitor Sign In Sheet

Today's Date	Visitor Name	Resident Address	Business Name	Business Address	Purpose of Visit

Please make this a part of this meeting's public record.

Thank you,

Bryan Sayles

**Re; Board of Selectmen Regular Meeting
item 28-Correspondence.**

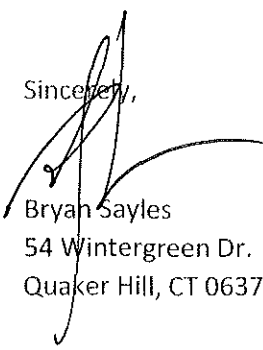

Dear Board of Selectman,

There are presently two petitions circulating. One, petitioning First Selectman (FS) Rob Brule to hold a town wide public information meeting about the NE Edge, LLC Data Center project. The second, a petition *OPPOSED to further planning and construction of said Data Center.*

Line item 28 of today's Board of Selectman (BOS) meeting is titled **Correspondence** and lists familiar names of Waterford residents with the words - **Data Center Petition** or **Data Center Email** next to them. Neither offers substantive context. Of the petitions that I am aware of, one petition relates to FS Brule not the Data Center while a second petition states **OPPOSITION** to the further development and construction of that Data Center. Lastly, it would be helpful to elaborate on what Data Center Email means. If only a sentence or two.

Please record my written comments as a record of this meeting.

Sincerely,

Bryan Sayles
