TOWN OF WATERFORD

Inland Wetlands & Watercourses Permit #C-21-06
394 Willets Avenue Extension, 61 & 61A Myrock Avenue, Waterford, CT

The Waterford Conservation Commission, in their capacity as the Town's Inland Wetland Agency, hereby authorizes the applicant to conduct regulated activities in designated areas located at 394 Willets Avenue and 61 & 61A Myrock Avenue, Waterford, CT, which are subject to jurisdiction in accordance with CT General Statutes, Section 22a-36 through 22a-45, inclusive, as amended, and the Waterford Inland Wetlands and Watercourses regulations.

This permit is a grant of approval to conduct the following regulated activities:

1. Temporary disturbance of 4,440 square feet of inland wetland within 225 feet of a sewer utility easement to install a sewer main and replace mineral soil and wetland soil horizons within the excavated area.
2. Installation of @1,500 linear ft. of sewer main within the 100 ft. upland review area of a forested wetland.
3. Annual mowing of vegetation within the sewer easement to allow for inspection and maintenance of the manholes.

These regulated activities are associated with the proposed construction of a gravity sewer main on properties located at 394 Willets Avenue Extension, 61 & 61A Myrock Avenue, Waterford, Connecticut. The proposed activities are shown on a plan entitled; "Waterford Woods Site Modification – Gravity Sewer Main, 394 Willets Avenue Ext., 61 & 61A Myrock Ave", dated 6/7/21, prepared by Yantic River Consultants, LLC.

The Conservation Commission authorizes the regulated activity with the following conditions of approval to minimize impacts associated with the proposed regulated activity and protect the inland wetlands and watercourses on this site:

SPECIAL CONDITIONS:

1. The limit of clearing and disturbance shall be marked in the field and reviewed by the Commission's agent prior to the start of site clearing and earthwork activity.
2. A wetland scientist shall inspect the excavation of wetland soils and restoration of wetland soil strata within the wetland areas and document the restoration of wetland soil, wetland hydrology and soil stabilization measures. A post-construction report prepared by a wetland scientist shall be forwarded to the Conservation Commission's agent.
3. No permanent fill is authorized within the inland wetland resources.

4. Trench de-watering shall be directed to specified de-watering basins in accordance with the approved plan.
5. Sewer installation work shall be conducted within the summer dry period when groundwater levels are lower in order to minimize the de-watering requirements during excavation.

STANDARD CONDITIONS:

1. The Conservation Commission's agent shall be notified at least 48 hours prior to commencement of any regulated activity.
2. Final stabilization of disturbed soil areas, including all temporary and permanent soil disturbances, shall be stabilized with the application of loam, seed and appropriate erosion control measures.
3. At all times during site work and until soil areas are stabilized, the applicant shall install and maintain erosion and sediment control measures such as fabric filter fence, staked hay bales or other measures deemed necessary by the Commission's agent to prevent erosion and sedimentation impacts to wetlands and watercourses.
4. Erosion control and soil stabilization measures shall comply with the approved plans and the guidelines as established in the Connecticut Guidelines for Soil Erosion and Sediment Control, 2002, CTDEEP Bulletin 34.
5. Upon direction of the Commission's agent, erosion and sediment control measures shall be removed by the applicant following stabilization of the site.

All work and all regulated activities conducted pursuant to this authorization shall be consistent with the terms and conditions of this permit. Any structures, excavation, deposition of fill, obstructions of flow, encroachments or other regulated activities not specifically identified and authorized herein shall constitute a violation of this permit and may result in permit modification, suspension or revocation.

In the event that any additional wetland or watercourse regulated activities are required as a result of other agency permitting to support the proposed activity, the Waterford Conservation Commission reserves the right to reconsider the proposed regulated activity and may require modifications to minimize the impact to wetland resources.

In evaluating this application, the Commission has relied on information provided by the applicant. If such information subsequently proves to be false, incomplete and/or inaccurate, this permit may be modified, suspended or revoked.

This permit shall be valid for a period of 5 years. Permit extensions may be authorized in accordance with CT General Statutes § 22a-36 through 22a-45 inclusive. If the regulated activity is not completed within this time frame, the permit may be held to be invalid by the Conservation Commission or the applicant may be required to petition the Commission for an extension or re-issuance of the permit. The Commission may require the applicant to furnish additional information at that time.

The Conservation Commission renders this Summary Ruling in accordance with the Waterford Inland Wetlands and Watercourses Regulations based on the following considerations:

- A. The wetland disturbance is temporary and will not result in loss of wetland function.
- B. Short-term construction impacts will be minimized by sediment control and de-watering measures as proposed.
- C. Strict adherence to the terms and conditions of this inland wetland permit will protect the quality of inland wetlands and surface water on this property.

This permit will be strictly enforced. If the Conservation Commission finds that the applicant has not complied with the permit conditions or has exceeded the scope of this permit as set forth herein, or, if the intended use of the general site is not as represented by the application or the plan of record, the Commission may suspend or revoke this permit, direct the Environmental Officer to issue a cease and desist order, require the applicant to modify, extend or revise the site work, or require the applicant to restore the area to its original condition.

Dated: July 8, 2021
