PZC Form 2:

Application for Coastal Area Management Site Plan Permit

Property Address: 2 Forest Street

1. General

- a. This form must be submitted in conjunction with *PZC Form 1: Planning and Zoning Application* or, in the case of minor activities and if permitted by the Zoning Enforcement Officer, *Zoning Compliance Permit*.
- b. This form does not supersede or take the place of any state or federal permits. The applicant shall consult with the necessary agencies to review the possibility of additional permits, including general or individual permits that may be required for specific activities.

2. Authority

Consistent with Connecticut General Statutes, Chapter 444, Secs. 22a-90 to 22a-113j, Waterford's Planning and Zoning Commission, acting in the capacity of the Town's Zoning Commission, regulates certain activities upon properties which lie completely or partially within the coastal area as defined by CGS §22a-94(b). Specifically, the Commission's is authorized, cited in part, by the following:

Sec. 22a-105. Coastal site plan reviews. (a) Coastal municipalities shall undertake coastal site plan reviews in accordance with the requirements of this chapter.

(b) The following site plans, plans and applications for activities or projects to be located fully or partially within the coastal boundary and landward of the mean high water mark shall be defined as "coastal site plans" and shall be subject to the requirements of this chapter: (1) Site plans submitted to a zoning commission in accordance with section 22a-109; (2) plans submitted to a planning commission for subdivision or resubdivision in accordance with section 8-25 or with any special act; (3) applications for a special exception or special permit submitted to a planning commission, zoning commission or zoning board of appeals in accordance with section 8-2 or with any special act; (4) applications for a variance submitted to a zoning board of appeals in accordance with subdivision (3) of section 8-6 or with any special act, and (5) a referral of a proposed municipal project to a planning commission in accordance with section 8-24 or with any special act.

3. Coastal Resources and Policies

- a. By placing a check mark in the appropriate box(es), identify the coastal resources and their policies for each that is located on and adjacent to the property or that may be influenced by the activities associated with the application. Note: A resources may be located on site, adjacent and be off-site but influenced by the activities. Refer to CGS §22a-92(a) for General Coastal Resource Policy, CGS§221-92(b)(2) and CGS §22a-93(7) for definitions of each corresponding policy's coastal resource.

Coastal Resource	On-site	Adjacent	Off-site but within Influence
General Coastal Resources	✓	✓	
Beaches and Dunes			
Bluffs & Escarpments			
Coastal Hazard Area	✓	✓	
Coastal Waters, Estuarine Embayments, Nearshore Waters, Offshore Waters			
Development Shorefront			
Freshwater Wetlands and Watercourses			
Intertidal Flats			
Islands			
Rocky Shorefront			
Shellfish Concentration Area			
Shorelands	✓	✓	
Coastal Hazard Area ID Type (i.e. VE, A, etc.)	✓	NA	NA
Base Flood Elevation	✓	NA	NA
Tidal Wetlands		✓	

- b. Consistency with Coastal Resources and Policies.

Attached a typed and briefly statement of how the resources checked are consistent or inconsistent with coastal resource policies.

c. Identification of Potential Adverse Impacts on Coastal Resources

Please complete this section for all projects. Identify the adverse impact categories below that apply to the proposed project or activity. The applicable column must be checked if the proposed activity has the potential to generate any adverse impacts as defined in CGS Section 22a-93(15). If an adverse impact may result from the proposed project or activity, please use Part VIII to describe what project design features may be used to eliminate, minimize, or mitigate the potential for adverse impacts.

<u>Potential Adverse Impacts on Coastal Resources</u>	<u>Applicable</u>	<u>Not Applicable</u>	<u>Mitigation Proposed</u>
i. Degrading tidal wetlands, beaches and dunes, rocky shorefronts, and bluffs and escarpments through significant alteration of their natural characteristics or functions	☐	☒	☐
ii. Increasing the hazard of coastal flooding through significant alteration of shoreline configurations or bathymetry, particularly within high velocity flood zones - CGS Section 22a-93(15)(E)	☐	☒	☐
iii. Degrading existing circulation patterns of coastal water through the significant alteration of patterns of tidal exchange or flushing rates, freshwater input, or existing basin characteristics and channel contours	☐	☒	☐
iv. Degrading natural or existing drainage patterns through the significant alteration of groundwater flow and recharge and volume of runoff	☐	☒	☐
v. Degrading natural erosion patterns through the significant alteration of littoral transport of sediments in terms of deposition or source reduction	☐	☒	☐
vi. Degrading visual quality through significant alteration of the natural features of vistas and view points	☐	☒	☐
vii. Degrading water quality through the significant introduction into either coastal waters or groundwater supplies of suspended solids, nutrients, toxics, heavy metals or pathogens, or through the significant alteration of temperature, pH, dissolved oxygen or salinity	☐	☒	☐
viii. Degrading or destroying essential wildlife, finfish, or shellfish habitat through significant alteration of the composition, migration patterns, distribution, breeding or other population characteristics of the natural species or significant alterations of the natural components of the habitat	☐	☒	☐

4. Coastal Use and Activities Policies and Standards

- a. Identify all coastal policies and standards in or referenced by CGS Section 22a-92 applicable to the proposed project or activity:

- | | |
|---|--|
| ☒ General Development | ☐ Sewer and Water Lines |
| ☐ Water-Dependent Uses | ☐ Energy Facilities |
| ☐ Ports and Harbors | ☐ Fuel, Chemicals and Hazardous Materials |
| ☐ Coastal Structures and Filling | ☐ Transportation |
| ☐ Dredging and Navigation | ☐ Solid Waste |
| ☐ Boating | ☐ Dams, Dikes and Reservoirs |
| ☐ Fisheries | ☐ Cultural Resources |
| ☐ Coastal Recreation and Access | ☐ Open Space and Agricultural Lands |

- b. Consistency With Applicable Coastal Use Policies And Standards

Attach an explanation of how the proposed activity or use is consistent with all of the applicable coastal use and activity policies and standards identified in Part V. For projects proposed at waterfront sites (including those with tidal wetlands frontage), particular emphasis should be placed on the evaluation of the project's consistency with the water-dependent use policies and standards contained in CGS Sections 22a-92(a)(3) and 22a-92(b)(1)(A) -- also see adverse impacts assessment in Part VII.B below:

5. Mitigation of Adverse Impacts and Overall Consistency *(all applications)*

Attach a summary addressing each of the following:

- Describe the methods proposed to mitigate any adverse impacts.
- Explain why adverse impacts are not being mitigated, if applicable.
- Summarize why the project as proposed is consistent with the Connecticut Coastal Management Act

6. Potential Adverse Impacts on Water-dependent Uses (for project or activity is proposed at a waterfront site)

- a. Identification of existing and/or proposed Water-dependent Uses: Attach a description of the features or characteristics of the proposed activity or project that qualify as water-dependent uses as defined in CGS Section 22a-93(16). If general public access to coastal waters is provided, please identify the legal mechanisms used to ensure public access in perpetuity, and describe any provisions for parking or other access to the site and proposed amenities associated with the access (e.g., boardwalk, benches, trash receptacles, interpretative signage, etc.):
- b. Identify the adverse impact categories below that apply to the proposed project or activity. The applicable column must be checked if the proposed activity has the potential to generate any adverse impacts as defined in CGS Section 22a-93(17). If an adverse impact may result from the proposed project or activity, use Part VIII to describe what project design features may be used to eliminate, minimize, or mitigate the potential for adverse impacts.

*Potential Adverse Impacts on Future Water-dependent
Development Opportunities and Activities*

Applicable

Not Applicable

Mitigation
Proposed

i. Locating a non-water-dependent use at a site physically suited for or planned for location of a water-dependent use

☐☒☐

ii. Replacing an existing water-dependent use with a non-water dependent use

☐☒☐

iii. Siting a non-water-dependent use which would substantially reduce or inhibit existing public access to marine or tidal waters

☐☒☐

7. Acknowledgements; All applications

Application Content

The undersigned hereby acknowledges that this application and statements submitted herewith are true to the best of my knowledge and approval of the application is contingent upon compliance with all requirements of said regulations.
