Paul,

I am sending this to you since you are the Moderator of the RTM and Chairman of the Long Range Financial Planning Committee. Attached to this email is an email from Paige Walton, Tax Assessor, listing all of the 140 properties owned by the Town of Waterford. There are 55 properties listed as "vacant lots", owned by the Town but are not being used by the Town. Mr. Muckle, previous Chairman of the LRFP Committee, stated a few months ago during a RTM meeting that the issue of what to do with vacant land would be taken up with that Committee. I assume that this will be on the agenda for the LRFP Committee. If you fell otherwise perhaps this item could be referred to one of the standing committees of the RTM.

I hope that the LRFP Committee will look at each of these properties and forward their recommendations as to which ones should be kept for future use by the Town or should be sold. If any of these vacant lots have no useful Town purpose why not sell them and become taxable land that could be developed by those who purchase these vacant properties.

I ask that you forward this email along with the list of the 140 properties to the RTM and the LRFP Committee under correspondence. You may have to obtain a copy of these properties from the Tax Assessor since the her attachment is legal size. Along with the list provided by Paige, there are individual street cards and GIS mapping for each property.

Thank you for your consideration.

Ted Olynciw, RTM Rep. 2nd District
62 Twin Lakes Drive ,Waterford CT 06385

Subject: vacant town properties request

Good Afternoon Mr. Olynciw,

Attached please find an excel spreadsheet containing all town-owned properties. Properties that are vacant are highlighted in blue. Also attached is a file containing the street cards for all highlighted properties.

The properties you requested are located throughout the town and therefore appear on various maps. I have included the link to Waterford's GIS maps below which will allow you to search each property by street address to pinpoint the location on each respective map.
