

You're Invited to an in-person workshop

Alewife Cove: Identifying the Issues, Solutions, and Criteria

Wednesday, March 18

10:00 AM – 12:00 PM

at the New London Recreation Center

1 Recreation Way, New London, CT

About this project:

Partially funded by the National Fish and Wildlife Foundation, the City of New London, the Town of Waterford, and Alewife Cove Conservancy are working together to determine the next steps for water quality improvement and resilience on Alewife Cove. The project aims to complete the necessary analysis and develop a feasibility study for stabilizing the Cove outlet, restoring tidal exchange to improve water quality and marine habitat within the Cove estuary, and preparing for future impacts due to changing sea levels and storm surge. Work includes data collection, modeling, and analysis of alternatives alongside public outreach and engagement.

Who is this for:

This workshop is designed for community members interested in initiatives related to the environment, planning, and community development.

What to expect:

This workshop is hosted by the City of New London, the Town of Waterford, and the Alewife Cove Conservancy, with Arcadis presenting the workshop content. The session will start with a formal presentation and Q&A session expected to last approximately one hour, providing valuable insights into the key challenges related to water quality improvement and resilience affecting Alewife Cove. Following the presentation, an open-house poster session will begin at 11:00 AM, allowing for one-on-one discussions and fostering collaborative dialogue.
