To: Robert Brule, First Selectman
From: Gary J. Schneider, Director of Public Works
Date: October 29, 2021
Re: FY23 Fleet Plan

The Department has completed the review of the vehicles called out for replacement per the RTM approved plan dated May 13, 2021. Each vehicle on the list was reviewed for operational need, maintenance history and planned replacement years.

For FY 23, the plan called for replacing 8 vehicles at an estimate cost of \$1,792,428. The Department is requesting 5 vehicles at an estimate cost of \$1,130,000.

Discussion on Planned FY23 Replacements:

The attached memorandum from Garon VanOverloop, Lead Mechanic discusses the vehicles that the Department is requesting replacement for in FY23 (Attachment 1). The Excel spreadsheet is the department's 5-year look ahead at replacements. The last column is a brief programing explanation for each vehicle assigned to the Department. (Attachment 2).

Attachment 3 is a list of corrections to the Public Works vehicles only.

Attachment 4 is the quotes for the requested vehicles.

Attachment 5 includes the repair costs and mileage for Public Works fleet

Justification for Replacements:

S20 and S21 Refuse Trucks. Currently there are 7 side loading trucks of this type in the fleet (2 of these are backup vehicles that take the place when a prime vehicle is in the shop for maintenance or repairs). They are special use vehicles that collect recyclable and garbage using an automated cart system. All 7 trucks are used collectively, to collect garbage and recyclables. The garbage trucks must complete their collection route and then travel to the waste to energy plant located just off I-395 in Lisbon. The plant will accept waste only until 5:00 each week day. If we miss this time, we would need to hold the waste in the truck itself and send it back up there the next day delaying the collection scheduled for that day. If it is a Friday, we may have to hold the waste over the weekend if we can't get it there Saturday morning. The recyclables are off-loaded at our Transfer Station, compacted and then taken to

Willimantic Waste in Willimantic. On occasion, the trucks themselves will have to go to Willimantic if the compactor is down.

The operation of these trucks is one person, the driver. The Department has kept two of the rear packers that are used for collection of bagged leaves and bulky waste. If the side loaders are down for a long time, they have been used in the past when the side loading trucks are down, but at a price. The crew size increases to 3, and the efficiency drops.

Repair Costs:

	<u>FY21</u>	<u>FY20</u>	<u>FY19</u>	<u>FY18</u>	<u>FY17</u>
S-20	\$16,466.48	\$10,516.58	\$9,440.19	\$9,559.27	\$9,627.73
S-21	\$14,580.56	\$12,268.69	\$9,430.78	\$7,368.98	\$10,960.63

H147 Trailer. Purchased in 1991, the trailer has served the town well. With our current equipment, a trailer with larger hauling capacity is needed as the equipment it hauls has increased in weight over the years.

Repair Costs:

	<u>FY21</u>	<u>FY20</u>	<u>FY19</u>	<u>FY18</u>	<u>FY17</u>
H-147	\$4,697.68	\$1,748.70	\$2,220.53	\$4,540.73	\$2,103.42

H18 Medium Duty Dump Truck and H39 5 Ton Dump Truck. The Department has 15 snow plow routes, each assigned a truck from a pickup to a 10 cubic yard truck. There are no "spares". When a truck goes down, the area is assigned to other trucks, resulting in longer cycle times which can cause issues with safe passage during the snow event. During the "non-snow" season, these trucks are used for general tasks until we have a major weather event where material must be removed from the roadside. These vehicles are used to transfer that material to various town sites for either disposal or processing.

Repair Costs:

	<u>FY21</u>	<u>FY20</u>	<u>FY19</u>	<u>FY18</u>	<u>FY17</u>
H-18	\$5,281.32	\$1,114.38	\$10,479.13	\$8,153.42	\$6,347.39
H-39	\$17,921.02	\$7,298.62	\$21,547.23	\$15,310.17	\$2,103.42

**INTER-OFFICE CORRESPONDENCE**

DATE: October 5, 2021

TO: Gary Schneider, Director of Public Works

FROM: Garon VanOverloop, Fleet Lead Mechanic

RE: FY23 Vehicle Replacement

The following are the assets that I am recommending to be replaced in the FY23. My assessment of each, are based off of their current mechanical state, physical condition and reliability to the fleet.

S20 is a 2016 PETERBILT 320, REFUSE TRUCK, VIN-3BPZLJ0X2GF100839 currently with 75,825 mi, 8,181hrs. Per the Fleet Management plan this vehicle is scheduled to be replaced in FY23. The replacement schedule for S20 is a SEVEN year replacement plan that has proven to be an accurate guideline. S20's mechanical integrity is adequate as of date with a few moderate repairs to the drivetrain. The chassis and body are showing signs of deterioration caused from corrosion that will continue to worsen as time goes on. S20 is still a reliable asset to the town but will continue to age quickly, thus increasing the repair and downtime frequency.

S21 is a 2016 PETERBILT 320, REFUSE TRUCK, VIN-3BPZLJ0X9GF100840 currently with 62,247mi, 8,088hrs. S21 also follows the SEVEN year plan and is very similar to its sister truck S20 in terms of its overall physical and mechanical condition. S21 also mirrors the reliability that S20 displays.

H18 is a 2009 INTERNATIONAL 4300 MEDIUM DUMP/PLOW TRUCK, VIN-1GNSKDEC4LR276122 currently has 60,876mi 5,920hrs. H18 is scheduled to be replaced FY24 however, this is the second year I am highly recommending this truck to be replaced. Due to the particular type of powertrain, extensive body/chassis deterioration, the reliability of this truck is continuing to decline. The condition of the body is rapidly approaching the point of requiring a complete body/major chassis replacement. The engine was a first time ever design build that was taken out of production three years after its release leaving many owners of these builds with countless hours of downtime and heavy repair costs.

H39 is a 2009 INTERNATIONAL 7400 5 TON DUMP/PLOW TRUCK, VIN-1HTWDAAR29J077349, currently has 60,533mi, 5,288hrs. H39 is scheduled to be replaced in FY25 however, I am requesting for a second year in a row that this truck to be replaced. H39 is a very similar to H18 in terms of the engine build and body deterioration. My assessment of this truck mirrors H18 with an increased amount of

downtime for repairs that would normally have not been seen in other trucks of this type given the mileage and hours.

H147 is a 1991 ROSCO 3TON UTILITY TRAILER, VIN-1YB411327M1B1T617, mileage & hours are unavailable because of the type of asset. This trailer has been a reliable unit to the highway department over its lifetime. Due to the age, frame deterioration and the increasing limited use abilities I recommend this trailer to be replaced in FY23. If approved for replacement, I recommend we upgrade to a larger equipment transport trailer that gives the department more versatility. A 12ton trailer would immediately increase the logistical efficiencies for the highway department. For example, a trailer of this size would be able to move several pieces of equipment to and from job sites in one trip versus making several trips. In addition to our current needs, a trailer of this size would also be needed in order to transport a mini-excavator with accessories if approved in the future.

All of the above assets that I am requesting to be replaced, are a high priority to the town and the requirements of the Public Works Department. Given the nature of today's current back log of parts, build demand increases while a decrease in production of equipment builds. Once these orders are placed, the delivery lead time has increased to a 4-6month lead time. An example would be our most recent refuse truck build. This process was started in October of 2019 with the replacement proposal steps. Early summer of 2020 we started the process of building the chassis and body specs with the chosen manufacturers. By the fall season this step was completed and the purchase orders were signed. From this point forward the typical delivery time is one year. The time that this process takes to complete, the age and repair costs continue to increase while the reliability decreases.

Regards,

Garon VanOverloop
Fleet Lead Mechanic
