RE: Special Permit Approval
358-360 Mago Point Way, Waterford, CT
Our File #6713.245651

Chairman Massad:

Our law firm represents Mago Way Realty LLC, a Connecticut limited liability company and owner of 358-360 Mago Point Way in the Town of Waterford. Enclosed with this letter please find an Application for Special Permit and associated Site Plan Approval for the adaptive reuse of a former automobile repair garage to a seasonal pickleball clubhouse with outdoor dining. We would respectfully request that this Application be received at the next regular meeting of the Town of Waterford Planning & Zoning Commission and scheduled for the required public hearing.

Statement of Use

The subject application entails the adaptive reuse of a former automobile repair garage located on 0.58 acres land to a seasonal pickleball clubhouse with outdoor dining. Recreational Uses are permitted by Special Permit and Outdoor Dining is permitted by Site Plan Approval in the underlying Mago Point District. Construction of a pickleball court and pollinator gardens were already approved and installed on the property by Zoning Permit in 2022. The Applicant now seeks to renovate the existing one-story garage for use as a clubhouse for a private pickleball club. The clubhouse would consist of a small lobby, lounge, mechanical room, and bathrooms. The building is served by public water and sewer. Due to the location of the existing building within the federal floodplain, renovations have been carefully designed to be valued at less than 50% of the building value (approximately \$100,000.00). Exterior to the building, a detached pergola is proposed to soften the building appearance and extensive landscaping and permeable pavers are proposed to replace the existing and deteriorated bituminous parking lot. An area for a foodtruck/trailer and seating is proposed that would provide for seasonal outdoor dining. The project is exempt from Coastal Site Plan Review as it consists of interior modifications and minor exterior site work. Four onsite parking spaces are proposed which are supplemented by seven offsite parking spaces provided at nearby properties within 1,200 feet of the subject property. The proposed uses will be open from dawn to dusk but are seasonal in nature, from April to November each year. Employees will be limited to a periodic clubhouse maintainer and a foodtruck/trailer operator.

Statement of Design Compatibility

The former automobile repair garage is a one-story concrete block structure which has limited architectural features. Due to the federal floodplain requirements, significant renovation or enhancement of the building is not feasible. However, the proposed renovations will include painting the exterior and the installation of new doors on the building as well as the construction of the pergola that will partially screen and improve the overall appearance of the structure. The replacement of the deteriorated bituminous parking lot with extensive landscaping and pervious pavers will also dramatically improve the overall aesthetics of this site.

Consistency with Adopted Plan of Preservation, Conservation and Development

The adaptive reuse of this former automobile repair garage is entirely consistent with the Plan of Preservation, Conservation and Development and the recommendations of the Mago Point Redevelopment Plan which ultimately culminated in the adoption of the Mago Point District Regulations in 2016. The purpose of these Regulations is “to allow a mixture of land uses which maintain a waterfront village ambiance, enhance the vitality of the district and attract visitors to the area in accordance with the Plan of Conservation and Development, with emphasis on waterfront access.” Mago Point remains Waterford’s only active commercial waterfront yet the closure of businesses in this area, increase in the number of vacant buildings, and general lack of maintenance by some property owners have focused revitalization efforts into this area. The redevelopment of this currently underutilized and partially vacant site with a new and vibrant seasonal recreational use along with outdoor dining seeks to help continue to reverse this decline and provides a further catalyst for other reinvestment.

The future vision for Mago Point as a coastal commercial setting of concentrated development (See discussion of Mago Point on pg. 62 and the Future Land Use Map on p. 82 of the POCD) will enhance the ambiance and vitality of Waterford’s waterfront and attract customers and visitors to the town. While this specific site is set back from the waterfront, the proposed recreational use and outdoor dining would be a highly attractive gateway development near the entrance to Mago Point and would complement other new buildings recently constructed and proposed in the area. The proposed uses create new activity, which will have a ripple effect on other local businesses. The improvements to the existing building, which are admittedly modest due to floodplain requirements, are fully compatible with other recent development along the Niantic River and Niantic Bay and will help further define the character of this reemerging coastal village. The resurgence of downtown Niantic just across the river certainly suggests that this type of positive change can happen at Mago Point with enough critical mass.

Special Permit Findings

23.5.1 Compliance with the Adopted Plan of Preservation, Conservation and Development

See the statement of consistency with adopted Plan of Preservation, Conservation and Development above.

23.5.2 Orderly Development

The adaptive reuse of the former automobile repair garage for recreational use is a creative approach to the redevelopment of a floodplain constrained property. Improvements to the exterior of the

building and the site will improve the overall appearance of the area and is in harmony with the recent redevelopment efforts taking place at Mago Point which encourage additional reinvestment.

23.5.3 Property Values

The improvements to the existing building and site will only positively impact the property value of neighboring properties, removing an eyesore and replacing it with a vibrant recreational and outdoor dining use at the gateway to Mago Point.

23.5.4 Public Safety

The reuse of an existing building with a low intensity recreational use and outdoor dining is a perfect fit for the site and does not propose any impact to public safety or access for emergency vehicles and equipment.

23.5.5 Traffic Considerations

The surrounding street network is more than adequate to support the low-intensity reuse of the property for seasonal recreational use. Sufficient on-street and off-street parking is provided and there is no significant traffic generation or congestion anticipated from the proposed uses.

23.5.6 Landscaping and Buffers

The existing building and site have literally no landscaping or buffering provided and the proposed plan includes a robust landscaping plan to enhance the appearance of the site and provide plantings throughout that will enhance the site's interplay with adjacent commercial properties.

23.5.7 Relationship to Utility Systems, Drainage Systems and Impact on Community Facilities

The site will remain served by public water and sewerage and the significant proposed reduction in impervious surfaces will dramatically improve stormwater discharge off of the site.

23.5.8 Compliance with Zoning Regulations

The proposed adaptive reuse of the site, noting that the existing building is nonconforming in some respects, fully complies with all other applicable use, bulk, and dimensional requirements of the Mago Point District.

Thank you for your attention to this matter and please do not hesitate to contact our offices if you require any additional information to process this Application.

Very truly yours,

William R. Sweeney, Esq.
