Side Yard Setback and Lot Coverage Variance for 20 Laurel Street

The subject property is a legally existing lot of record that predates the adoption of the current zoning regulations. The property is located within the VR-75 district and contains approximately 3725 square feet. The lot is currently improved with an existing single-family residence constructed prior to the enactment of the current zoning requirements.

The hardship associated with this application arises from the unique physical characteristics of the property itself. Specifically, the lot's limited dimensions, area, and configuration, together with the location of the existing dwelling, create circumstances that prevent the property from reasonably conforming to current zoning requirements. The existing residence was constructed prior to the adoption of the current regulations and occupies a location on the lot that does not conform to present-day setback requirements. As a result, strict application of the zoning regulations significantly limits the ability to make reasonable improvements to the property.

The hardship is not self-created and does not result from any action of the current owner. Rather, it is a direct consequence of the property's pre-existing nonconforming status and the physical constraints inherent to the lot. These conditions are not generally shared by conforming properties within the zoning district.

We appreciate your consideration of this request and look forward to the meeting.
Thank you.
